

3PL FINISHING TURF MOWERS

Available in 1.5, 1.8, 2.4, 3.0, and
3.6hp cutting widths. Hydraulic Tilt
Catchers available for all sizes.

Ideal for both domestic and
farming/industrial use.

ADVANCED MODEL AVAILABLE

Available on all models featuring electric height adjustment with
a digital in-cab display and high speed stability skids.

The new electric height adjustment allows full control of your mowing
height from the seat of your tractor. It enables the operator to adjust the
mowing height quickly and easily using the digital control unit fitted in the cab.
This is ideal when mowing various grasses or in varieties where different mowing
heights are required. This feature can also be ideal when mowing
a finish cut prior to harvesting.

The advanced model also includes our expertly designed high speed
stability skids. The H.S.S skids are fitted in each deck to help reduce bounce
 whilst mowing allowing up to 50% increase in speed.

These new features will provide ease and convenience to all operators.

SALIBA AG
