

TRAILING FINISHING TURF MOWERS

Available in 5.5, 6.0, 7.0,
7.5 and 9.0cv cutting widths.

5.5cv and 7.0cv models fold in
under 3.5m for transport.

Ideal for large open spaces
including turf farms, sporting fields,
golf courses and more.

ADVANCED MODEL AVAILABLE

Available on all models featuring electric height adjustment with
a digital in cab display and high speed stability axle.

The new electric height adjustment allows full control of your mowing
height from the seat of your tractor. It enables the operator to adjust the mowing
height quickly and easily using the digital control unit fitted in the cab.

This is ideal when mowing various pastures or varieties
where different mowing heights are required. This feature can also be
ideal when mowing a finish cut prior to harvesting.

The advanced model also includes our expertly designed high
speed stability axle. The H.S. axle is fitted to each deck to help reduce bounce
 whilst mowing allowing up to 60% increase in speed.

These new features will provide new levels of convenience to all operators.

FEATURES INCLUDE

- Fully gearless drive design
- Stainless steel body panels on all decks
- Heavy duty ballbearing designed purpose built gear boxes complete with optimal shaft on gear (square high speed bearings used), allowing the capability of running on a higher PTO speed
- Large diameter rollers on front section of each deck with internal seals, for consistent mowing
- High quality square triple seal roller bearings with ball type grid loading areas for longevity
- Specially designed blades for consistent quality and maintenance
- Double locking adjustable roller adjusters with dual grease nipples for easy height adjustment
- Flipped guards for easy access to gearbox and drive line
- Baller type couplings for flexibility and shock absorption for gearbox protection
- Front hydraulically actuated tie rods connect drive shafts
- Available with lift axle on rear tyres
- Blade designed folding and floating system to follow the ground's contour
- These decks can lift the full the ground without folding wings to avoid drive shaft damage
- Hydraulic lifting system on wing decks
- Wide angle PTO shaft with clutch and sensor system
- Low maintenance required
- A cost effective solution to mowing large areas
